

GUIDELINES FOR THE

Mandatory Community Service Project (CSP)

As per APSCHE (Andhra Pradesh State Council of Higher Education) — CBCS Internship Framework
with Suggested Project Ideas for B.Tech Computer Science & Engineering Students

1. Introduction

The Community Service Project (CSP) is the first of three mandatory internships prescribed by the Andhra Pradesh State Council of Higher Education (APSCHE) under the revised Choice Based Credit System (CBCS) for all four-year UG programmes, including B.Tech. It is an experiential learning strategy that integrates meaningful community service with instruction, participation, and learning, linking the institution with the surrounding community for mutual benefit.

Through the CSP, students apply their academic knowledge to real community needs, developing social sensibility, communication skills, and a sense of civic responsibility — while the host institution strengthens its role as a socially engaged organisation.

2. Regulatory Framework

The CSP is mandated by the Government of Andhra Pradesh (G.O. Ms. No. 46, HE (CE) Dept., dt. 22.12.2020) and detailed guidelines/corrigenda issued by APSCHE (Lr.No.APSCHE/AC/CBCS-2019-20/Review/22, dt. 25.03.2022), and implemented through a Standard Operating Procedure (SOP) issued by the Commissioner of Collegiate Education. It is designated as the 1st Internship under the mandatory internship framework for UG programmes, with the details summarised below.

Component	Marks	Credits
1st Internship — Community Service Project (CSP)	100	2

3. Duration & Credits

- Duration: 4 weeks, amounting to a minimum of 100 hours of engagement
- Credits: 2 credits under CBCS, awarded purely through internal assessment.

4. Weekly Schedule / Structure

Week	Activity
Week 1	Socio-economic survey of the assigned village / habitation / municipal ward using a structured questionnaire.
Week 2	Community awareness campaign based on issues identified during the survey.
Week 3	Main project implementation — domain-specific work related to the student's subject area.
Week 4	Project report compilation, log book finalisation, and preparation for presentation/viva.

5. Implementation Guidelines

- Students may work individually or in small groups, ideally assigned to a habitation, village, or municipal ward near their place of residence for ease of commuting.
- Each faculty mentor is assigned a group of 10–15 students and is responsible for orientation, guidance, and continuous assessment.
- All regular, contract, and guest faculty may serve as CSP mentors.
- The CSP must be distinct from regular NSS/NCC/Green Corps/Red Ribbon Club activities, even if conducted in the same village.
- The project has two components: (a) a socio-economic/domain-specific survey of the community, and (b) a project/activity related to the student's own subject area — for Computer Science students, this typically means digital literacy, e-governance support, or small-scale software/data solutions.
- A log book must be maintained throughout, recording all activities, and countersigned periodically by the faculty mentor.

6. Role of the Faculty Mentor

1. Provide orientation and training on survey methodology, questionnaire design, log book maintenance, and report writing.
2. Assign a village/habitation/ward to each student or group as per convenience.
3. Guide students through the socio-economic survey process.
4. Support the design and execution of the community awareness campaign.
5. Verify and countersign each student's log book.
6. Guide project implementation and report preparation.
7. Evaluate the project and award marks as per the assessment methodology.

7. Assessment Methodology

CSP is assessed entirely through internal evaluation, for a total of 100 marks, distributed as follows:

S.No	Assessment Component	Maximum Marks
1	Project Log Book	20
2	Project Implementation	30
3	Project Report	25
4	Project Presentation / Viva-Voce	25
	Total	100

An internal viva is conducted by a committee constituted by the Principal/Head of Institution, typically comprising the CSP mentor, one faculty member from an allied department, and one from Languages/other courses.

8. Guidance for Computer Science Departments

APSCHE guidelines specifically encourage Computer Science departments to focus their CSP activities on computer literacy for different sections of the population — youth, women, homemakers, farmers, and small

business owners. This gives CSE students a natural, discipline-aligned direction for their project component in addition to the general socio-economic survey.

9. Suggested Project Ideas for B.Tech CSE Students

The following project ideas align with the CSP's twin objectives of community benefit and subject-relevant application. Students should select one project, adapt its scope to the needs of their assigned habitation, and document it in the project report.

9.1 Digital Literacy & Cyber Awareness

#	Project Title	Description / Community Benefit
1	Digital Literacy Camp	Teach villagers basic smartphone/computer use — UPI payments, WhatsApp, e-mail, and safe internet browsing.
2	Village Website / Information Portal	Build a simple static website listing village schemes, contacts, school/PHC details, and local business directory.
3	e-Governance Assistance Drive	Help residents access Aadhaar, ration card, pension, and other portal-based government services online.
4	Digital Payment Awareness	Demonstrate UPI/QR-based payments and educate shopkeepers on setting up digital payment acceptance.
5	Cyber Safety & Fraud Awareness	Conduct sessions on phishing, OTP fraud, and safe social-media practices for youth and senior citizens.

9.2 Education & Healthcare Support

#	Project Title	Description / Community Benefit
6	Coding & Computer Basics for School Children	Introductory programming/logic-building sessions (Scratch, basic Python) for local government-school students.
7	School Attendance / Record Digitisation	Digitise a nearby school's attendance registers or library catalogue using a simple spreadsheet or small app.
8	Health Record / Telemedicine Awareness App	Prototype a simple app/spreadsheet for tracking immunisation or health-camp records at the local PHC.
9	e-Learning Content Kiosk	Curate and set up offline educational videos/e-books on a shared PC or low-cost device for the village library.
10	Data Entry for Government Schemes	Assist Anganwadi/Panchayat staff in digitising beneficiary data for welfare scheme tracking.

9.3 Agriculture, Livelihoods & Women's Empowerment

#	Project Title	Description / Community Benefit
11	Farmer Helpline / Market-Price Awareness	Show farmers how to check mandi prices, weather forecasts, and crop-advisory apps on their phones.
12	Digital Marketing for Local Artisans/SHGs	Help Self-Help Groups or small businesses set up WhatsApp Business/social media pages to sell products.

#	Project Title	Description / Community Benefit
13	Inventory/Billing Tool for Small Shops	Create a simple spreadsheet or basic app to help a local shop track stock and daily sales.
14	Women's Digital Empowerment Workshop	Train women/SHG members in digital literacy, online banking, and basic computer operation.
15	Waste Management / Civic Issue Reporting Tool	Build a simple form-based tool (e.g., Google Form + dashboard) for residents to report civic issues to the Panchayat.

10. Model of the Project Report

The following structure, prescribed under the APSCHE guidelines, sets out the model format to be followed while compiling the CSP project report.

PART – A

1. Introduction:
 - About the Village / Habitation
2. Socio-Economic Survey of the Village/Habitation.
 - Data collection using prescribed formats
3. Problems identified and analysis of the problems.
4. Short-term and long-term action plan for possible solutions to the problems identified, which could be recommended to the concerned authorities for implementation.
5. Community awareness programmes conducted with respect to the problems, and their outcomes.

PART – B

6. A mini-project work in the related subject with respect to the habitation/village.

PART – C

7. Recommendations and conclusions.
8. References.
